## Global Solution in Animal Transport

### Global Solution in Animal Transport

Providing safe and secure logistics for animals of all shapes and sizes, our specialist team will ensure the welfare and safe transport throughout the entire journey.

Whether you need the solution to race events or conservation program, we will provide tailored solutions, along with our in-flight care team onboard, accompanying the animals to ensure professional care during every flight, preventing any potential risks and hazards.

Our expert team has an in-depth knowledge of IATA's Live Animals Regulations (LAR) – the global standard in transporting live animals by commercial airlines.

Whatever your animal transport requirements, our specialist team is ready to assist. We provide solutions for:

- Equine air transport
- Livestock air transport
- Exotics air transport/
- Stalls & penning equipment

## Why Sky Pacific Network for Live Animal Air Transport?

### Sky Pacific Network: Live Animal Air Transport

**Expert Knowledge:** Our experienced team is well-versed in IATA Live Animals Regulations – the worldwide standard for transporting live animals by commercial airlines.

**Global Coverage:** No matter where your cargo needs to get to or where from, our international network of offices provides local knowledge on a global scale.

**Airport Access:** We can reach airports under-serviced locations, allowing your animal cargo to arrive closer to its final destination and avoiding lengthy road transfers.

**Personal Account Manager:** Your dedicated charter expert is available 24/7 to assist with enquiries.

**Flight Representation:** One of our charter experts can assist you on the ground to ensure all aspects of your cargo charter run smoothly.

## Safe Transportation of Live Animals as Air Cargo

**Safe Transportation of Live Animals as Air Cargo is based on three controlling environmental factors:**

Temperature

Humidity Level

Cargo compartment carbon dioxide (CO<sub>2</sub>)

Each type of animal has unique environmental requirements that must be taken into consideration for optimal health.

To ensure the health of the Live Animals, proper ECS settings, animal handling, packaging and loading procedures must be used:

- Airplane ECS control setting (Environmental Control System)
- Animal physiology
- Airport and enroute environments
- Ground handling
- Strict adherence to IATA regulations
- Dedicated SOP's and check lists

## Safe Transportation of Live Animals as Air Cargo

### What's important in Animal Transport

- 1. Outside air temperature:** The higher the air temperature, the more time is required to cool the cargo compartment prior to loading animals
- 2. Quantity, size and type of animal cargo:** These factors affect the heat load, moisture and CO2 in the cargo compartment
- 3. Airplane environmental system configuration:** APU and air conditioning performance are affected by the ambient air temperature
- 4. Condition of airplane prior to loading animals:** Heat soak and preconditioning the cargo compartment both affect the amount of the time required to reach the desired temperature
- 5. Time on ground with loaded cargo:** The longer the time that the airplane is on the ground with loaded live animal cargo, the longer the airplane will be required to cool the cargo compartment to a desired temperature
- 6. Animal packaging and stocking densities:** The longer the time on the ground and the duration of flight, the lower the recommended density of animals in the cargo compartment.

### Service Specifications

Professional advice & consulting  
Guaranteed booking  
Standard flight equipment  
Special flight equipment  
Escort (until final destination)  
Check list  
Loading at the airport  
Expedited ramp transportation  
Minimum tarmac time  
Trained personnel  
Protection from extreme conditions  
LIFO – Last In First Out  
Temperature controlled cargo hold in aircraft  
Animal feeding  
Expedited delivery on arrival  
Prioritized ground handling  
Quarantine transit station  
Ground transportation  
Full charters option available  
Tailor made S.O.P's
